

The issue facing the F.C.C. of broadcast ownership is very complex and strongly related to the basic principles on which this country is based: freedom of speech, public ownership of the airwaves, the right to information, and the value of diversity. Therefore I feel it is essential that there be extensive national discussion of these issues before the law is changed. Heretofore, there has been very little. I urge you to postpone the June 2 date for 6 months to a year. Engage the people before such a profound change is made.
